 **FOUNDATION™
TRAINING
AUSTRALIA**

ambition inspired

A large eagle is shown in flight, its wings spread wide, against a clear blue sky. In the background, there are soft, out-of-focus mountains. Another eagle is visible in the distance, flying towards the left. The overall scene is bright and clear, with a strong sense of freedom and movement.

*Not all RTOs are created **equal...***

...At Foundation Training Australia (FTA), we believe that training should be valued and used to better yourself; for both the employer's and the employee's prospects, equally now and in the future.

It is said that training or qualifications (THAT bit of paper) are required for their jobs, and it's something they have to do. However, so many want it but are not engaged in it. Why do students see training as a "drudge" and only do it because they have to or their job could be lost?

Ultimately, every person wants to be confident, competent, and committed to doing their job 'right' each and every day. Why? So they'll be empowered within themselves and in their careers, leading to greater success for them as individuals, for their families, and for their future.

Why Foundation Training Australia

Why are we Industry Leaders? We make no apologies for NOT being a “tick and flick”, here’s your certificate training organisation’. To achieve real competency there is training and work which must be done. Again we make no apologies for this approach.

This methodology takes a commitment from the Learner, the Trainer and of course the Employer, when undertaking a Traineeship or Apprenticeship. FTA want everyone to work safely, with the skills and knowledge required to be competent and confident in what they are doing. This is achieved by our industry leading training.

We believe people should be able to learn in inspiring and innovative ways, allowing them to enjoy a limitless and enriching education experience. At FTA our vision is to provide a Limitless Learning experience as our benchmark of this commitment. We achieve this with our experience and expertise, coupled with industry knowledge, commitment to quality educational and training programs, and of course; we’re bloody good at training!

Real training for real outcomes – not a statement but our commitment.

We believe that for a student to get the most out of their education, the learning must be relevant and the training must be tailored and have practical, real-world outcomes. We make no excuses for providing stringent curriculum requirements around the qualifications we offer. It’s all about producing employees capable of doing the best possible job, and providing employers with the best possible result.

Innovation across industries

FTA is an Australian-owned and operated Registered Training Organisation (RTO: 31972). We offer a range of high-quality industry courses across Australia under two trading entities –Infrastructure Training Australia (ITA) and Australian College of Computer Embroidery & Textile Technologies (ACCETT).

We are committed to furthering the industry by delivering training in a whole new way; which is why we’re developing a ground-breaking, industry-leading technology called ARTA. This immersive experience engages learners with a fusion of human and digital ‘hands-on’ situations and encounters, enabling them to see and experience the possibilities of their future skill sets.

Setting the standard

As a progressive and innovative company with a highly experienced and passionate team, we are committed to doing things differently – authentically, ethically, sustainably and of course with a no bullshit policy. Our vision is to become the benchmark for RTOs, and the RTO of choice for students, employers and our stakeholders.

ambition inspired

Infrastructure Training Australia

ITA is all about the individual. Our whole purpose is about ensuring students' ambitions are fuelled and nurtured throughout their learning journey.

We're focused on providing an environment that allows students to really extend themselves in a controlled situation. That way, when they're at work, they have a real, first-hand and practical understanding of their trade – so they're confident that they know what to do, to do their job right.

Specialising in training courses for Queensland's building, construction and horticulture sectors, ITA is dedicated to equipping students with excellent technical skills in these thriving industries.

Australian College of Computer Embroidery & Textile Technologies

ACCETT is all about inspiration. We're about lighting the fire in the belly of budding fashionistas, and enabling them to experience first-hand the dynamic range of possibilities and career opportunities offered in this vibrant and creative industry.

Our training environment empowers students with a sense of purpose to fulfil their fashion design dreams. We're focused on helping students become fully committed to achieving real-world outcomes through their learning, and to become confident in their ability to 'do it right' and realise their goals.

ACCETT is the only privately owned training organisation in Australia to offer digitised embroidery along with fashion design and textile technologies for creative industries.

ARTA

Visionary Training Intelligence

To truly be limitless we must think limitlessly. We must redefine the way we look at education and how it's delivered. We must look to the future of training and student interaction. Why? Because we have a belief that we must always be looking forward to do what we do better; using modern technology in a simpler more effective manner.

ARTA is revolutionising training with cutting edge, intelligent behaviour learning technology providing positive, sustainable outcomes and exciting opportunities for students and employers alike.

It is our job as leaders in training to be actual leaders. To achieve this, we must push the envelope – exploring ideas and thinking beyond the realms of what already exists. ARTA is at the forefront of education technologies.

EDUCATE | INNOVATE | ELEVATE

What sets FTA apart?

While our passion for providing students and employers with the best possible outcome, along with our commitment to innovation and continual improvement differentiate us from other RTOs, there are a number of additional key factors that help set us apart.

Experienced trainers and assessors

Our trainers and assessors have years of real-world industry experience. They make training engaging and relevant, providing students with practical skills and training in nationally recognised qualifications.

Funding

We proudly offer a wide variety of funding options for eligible students. These options are designed to financially support students' with their study and help them achieve their career goals.

Student support

Every student is supported in their learning journey with open access to their trainer. This enables students to ask any questions they may have, and to appreciate what they've achieved, as well as understand what they need to accomplish to complete their qualification. No matter where in Queensland students are located, we'll be there to support them.

Delivery

We offer a wide range of delivery options to suit different learning styles and situations – including workplace delivery, workshop delivery, self-paced online learning and mixed-mode delivery. Recognition of prior learning options may also be applicable, depending on students' past experience.

Create a better future with FTA

FTA suits students who are committed to achieving practical, real-world outcomes in their training to become confident and capable in their field of expertise. We suit employers who have a commitment to encouraging their employees to grow and develop into the highest version of themselves.

We know that when these two motivations are met, people, and ultimately businesses, succeed.

Your opportunity to create a better future starts now. Make the most of our cutting edge, engaging training that actually works and leads to ongoing benefits for both students and employers.
